08124969118 • adu.deraj@gmail.com.

Objective

Experienced JavaScript Developer with 2 experience. Proficient with React. Seeking for new opportunities and challenges that will expand my skill set. Most proud of rubies a responsive online website I developed for a client writing clean reusable codes, detailed adoption of the Figma design and easy navigation of the site for users.

Skills

JavaScript (ES6)
React fundamentals (JSX, Virtual DOM, Node.js)
CSS, Git, Figma
Node Package Management(npm), GitHub repository
UI/UX, RestfulAPI, performance checking, documentation
Excellent Communicator
Team-oriented
SEO Integration

Work Experience

Groco Website

2 weeks

<https://deramultipagewebsite.netlify.app>

- Built with:
- Git lens, Html5, SCSS, Font-awesome
- CSS grid, JavaScript, tidio-chat box
- Duration: 1 week
- A responsive E-commerce website for farm products like fruits and vegetables.
- Ability to view optimal layouts on different screen sizes and hover states was achieved. Switching to
- different pages and website interactivity was achieved using javascript. Tido chat box for ease of customers interaction.

Geriche Restaurant Template

2 weeks

<https://restaurants-get-rich.netlify.app>

- Used understanding of React fundamentals to promote better component lifecycle practices.
- Made use of react hooks(useState, useEffect, and useRef) for stateful logic and side effects.
- Used perfectly placed media queries for satisfactory responsiveness
- Installed the necessary dependencies needed to create the website
- Accurately translated Figma design into functional and reusable frontend code.

Note app

2 weeks

<https://derabola-note-app.netlify.app>

- Created a note app in React and integrated the app with localStorage
- Created functional react components that returns rendered HTML based on data it holds.
- Used react hooks which allowed me to execute code and update states at various stages in the lifecycle of the app.
- Users can save, delete and search for their saved notes

Oneport 365

2 weeks

<https://snazzy-pegasus-14cadcd.netlify.app/>

- This project is a dashboard with two active pages(Customers page and Shipments page) that navigates to other pages.
- Made use of react-router-dom to navigate pages within the app.
- Made 4 API calls to receive data and display it on client side.
- Included a drag and drop feature for image upload, filter function on the search box and delete function.

Movie App

2 weeks

<https://movie-api-derabola.netlify.app>

- Consumed a movie api to create a movie app using React
- Users can see all movies and details per view of each movie– by entering keywords of your favorite movie(Eg: Star Wars)
- There's an add and delete functionality of favoured movies
- Favoured movies are stored in the local storage and remains even after refreshing the browser.

Education

B.Sc Chemical Engineering

January 2014 - September 2021

University of Lagos

- University Project: Built an ORC (Organic Rankine Cycle) system for small scale power production. This involves using low energy consuming fluids to generate power in order to reduce carbon emissions for a greener and sustainable environment.

Certificates

Introduction to HTML5 - University of Michigan (2020) Introduction to CSS3 - University of Michigan(2020) Google digital Marketing (2020)
Interactivity with JavaScript - University of Michigan(2021) Introduction To Software Project Management (2021)
